ENGR. SAMITAH HASSAN

PEC No.: BIOMEDICAL/003118

03348832328 | samitah.hassan1997@gmail.com
Flat No. F-A-1, Islamic Apartment, Block 2, Gulshan-e-Iqbal, Karachi

PROFESSIONAL OBJECTIVE

Motivated and detail-oriented Biomedical Engineer with a strong foundation in engineering principles applied to healthcare and medical technologies. Seeking a position where I can contribute my technical expertise, analytical skills, and passion for innovation in biomedical systems. Known for strong leadership, adaptability, and the ability to thrive under pressure in fast-paced environments.

CORE SKILLS

- Biomedical equipment troubleshooting and calibration
- Project management and documentation
- Proficient in Microsoft Office and Excel
- Strong analytical, organizational, and problem-solving abilities
- Effective verbal and written communication
- Familiarity with informatics software
- Ability to collaborate with teams at all organizational levels

PROFESSIONAL EXPERIENCE

Hamdard University, Karachi | *Jan 2025 – Jun 2025*

PEC OJT Biomedical Lab Intern

- Maintained biomedical laboratory records.
- Assisted with laboratory-based troubleshooting of biomedical equipment.
- Operated PowerLab 26T for experimental procedures.
- Prepared the Information and Communication Technologies (ICT) lab manual and taught the lab to first-semester students.

Dow University of Health Sciences, Karachi | *Jul 2019 – Aug 2019*

Biomedical Engineering Intern

- Maintained biomedical equipment records using MS Excel.
- Calibrated various medical devices and checked their proper functionality.
- Visited hospital departments to learn the basic operation and configuration of medical machinery.

Tabba Heart Hospital | *Aug 2019 – Sep 2019*

Biomedical Engineering Intern

- Performed calibration and basic repairs of biomedical devices, including pulse oximeters, defibrillators, and ECG leads.
- Conducted hardware replacement and soldering.
- Gained hands-on troubleshooting experience across various hospital departments.

EDUCATION

NED University of Engineering and Technology | *Ongoing – Third Semester*
Master's in Biomedical Engineering

- CGPA: 3.72/4.00

Hamdard University | *Graduated 2022*
Bachelor of Engineering (B.E.) in Biomedical Engineering

- CGPA: 3.72/4.00

St. Lawrence's Government Girls Degree College | *Passed 2015*
Higher Secondary Education

- Score: 80%

GRADUATION PROJECT

Design and Development of a Vital Signs Patient Mannequin

Created a comprehensive system integrating hardware and user-centric software. Simulated human physiological functions with realistic feedback. Aimed to enhance learning by accurately replicating vital signs for clinical training.

Thesis Title: Investigating tDCS-Induced Changes in Cross-Hemispheric Brain Connectivity During Executive Function: An EEG and Graph-Theoretical Approach.

To investigate the effects of multi-session bilateral tDCS over the DLPFC on executive function and brain network organization.

LANGUAGES

- Urdu — Native
- English — Proficient

ACTIVITIES

- Volunteering for community initiatives
- Active participation in sports
- Creative writing and reading books
- Climbing and camping
