BIOMEDICAL ENGINEER

Passionate biomedical engineer with a keen interest in innovating public health and healthcare services. I am dedicated to exploring and implementing innovative ideas. My goal is to contribute to the improvement of healthcare delivery through expertise in equipment lifecycle management, regulatory compliance and effective training initiatives. Seeking a challenging role to further develop these skills and make a meaningful impact in the field.

KEY COMPETENCIES

Maintenance and calibration	Reporting and Documentation	Team leadership
Procurement & Inspection	Inventory management	Communication
Research & Development	Knowledge of ISO 13485:2016 (Medical devices)	Project management

PROFESSIONAL EXPERIENCE

World Health Organization, WHO Pakistan **March 2023 - Present**
Biomedical Engineer (APWEMER)

During my tenure, I played a crucial role in advancing healthcare infrastructure in Pakistan particularly on oxygen systems (production, delivery, application, training, maintenance and repair, regulations, and procurement). Throughout, I maintained a commitment to transparency, preparing various reports and supporting evidence-based decision-making. My work reflects a dedication to enhancing healthcare delivery and infrastructure on both national and international scales.

Accomplishments:

- Conducted comprehensive assessments of a total of 29 health facilities to evaluate biomedical equipment including respiratory equipment ranging from pulse oximeters, nebulizers, to ventilators, and anesthesia units, and healthcare infrastructure including number of beds, oxygen generation plants and oxygen manifolds compliance with international standards.
- Contributed to the procurement and maintenance process by designing protocols and collaborating with managing heads of biomedical engineers for a standardized training module.
- Initiated collaboration with Drug Regulatory Authority of Pakistan (DRAP) to legislate medical device policies for Pakistan.
- Assisted in the designing of first national guideline document for oxygen systems.
- Organized two (02) pilot national-level and provincial-level oxygen system training session on overview and policies for major hospitals and health departments in Pakistan, engaging a multidisciplinary team of biomedical engineers, healthcare administrators, and health departments.
- Prepared progress reports, inspection reports, budgeting proposals, bills of quantities (BoQs), and conducted research work to support evidence-based decision-making.

OneClick, Karachi, Pakistan **Dec 2021 - Feb 2023**
Healthcare and Management Coordinator

Led a team of research analysts, overseeing their work, managing proofreading processes, and ensuring adherence to compliance standards in the healthcare research projects.

Accomplishments:

- Strongly met deadlines and compliance of the projects
- Maintained monthly and bimonthly reports for orders and payrolls

Shaheed Nawab Ghaus Bakhsh Raisani Memorial Hospital, Pakistan **Nov 2020 - Nov 2021**
Biomedical Engineer
Showcased technical and managerial skills as a primary Professional Biomedical Engineer in the domains of services, inspection, and procurement of the hospital's medical machines, equipment, and tools. I was responsible to demand, evaluate and inspect the appropriate technical items for the placement of official tenders. My responsibilities also included maintaining technical records of medical equipment including designing of hospital inventory.

Accomplishments:

- Established the department of biomedical engineering for the first time for this 90-bedded hospital.
- Increased vendor participation in annual tenders by nearly 15-fold, transforming the previous 1 or 2 bidders to over 15 participants, through the strategic design of proper technical specifications for primary hospital machinery requirements and leveraging market connections.
- Delivered round-the-clock maintenance and capacity-building services to the hospital.

Medtrix Pvt. Ltd. **April 2019 - June 2020**
Trainee Biomedical Engineer
Visited and experienced different hospitals for the servicing of medical equipment and machinery with a senior Biomedical Engineer. Trained over basic servicing of ICU monitors, medical furniture including hospital beds and dental chairs, other medical equipment.

EDUCATION

Hamdard University **2015 - 2019**
Bachelors of Engineering in Biomedical Engineering
CGPA: 3.20

Azeemi Public Higher Secondary School, Karachi, Pakistan **2009 - 2013**
Secondary School Certificate (SSC) & Higher Secondary School (HSSC)
Science & Pre-Engineering

OTHER INFORMATION

Registered Engineer under Pakistan Engineering Council (PEC)
PEC Registration No.: BIOMEDICAL#02443
